

We're not like other supply chain consultants.

We help companies design and build agile supply chains to meet the demands of a complex, ever-changing world. Our goal is to drive real, measurable supply chain improvements that get you closer to your business goals.

Spinner SCA is the global supply chain consulting practice of Publicis Sapient. But we don't just advise — we architect, implement and run end-to-end

supply chain capabilities from supply chain strategy and connected planning to warehouse optimization, transportation and AI.

Simply put, we help companies fix what's broken, innovate quickly and increase decision confidence.

Consulting engagements delivered

Solutions

End-to-end supply chain transformations

	Supply Chain Strategy & Transformation	Design, execute, and scale a supply chain strategy that works today and wins tomorrow
	Connected Planning & Fulfillment	Plan for growth and ensure operational effectiveness so products are available when and where they are needed
	Customer Order Promising & Delivery Optimization	Use customer intelligence to optimize promise-to-delivery flows and systems for fast, personalized experiences
	Warehouse Operations & Automation	Execute seamlessly while balancing flexibility, feasibility, and cost efficiencies within your distribution network
	Transportation Optimization & Visibility	From the first mile to the last mile, build a transportation network that delivers for you and your customers
	Supply Chain AI & Data Engineering	Harness the power of AI, machine learning and data science to make smarter, faster supply chain decisions
